

SSM Cardinal Glennon Children's Hospital

INTRODUCES

The Outpatient App for Patient Families

We understand your child needs daily medical care and monitoring. SSM Cardinal Glennon helps ease the process by collaborating with all your doctors, specialists and other providers to ensure your child gets the care he or she needs. In addition, we also support you with answers and information so you understand the process.

To help, we are introducing the **Outpatient Mobile App**.

What Is Outpatient?

Outpatient is a **care coordination app** that lets patient families communicate directly with Nurse Coordinators and Case Managers about your child and the care plan.

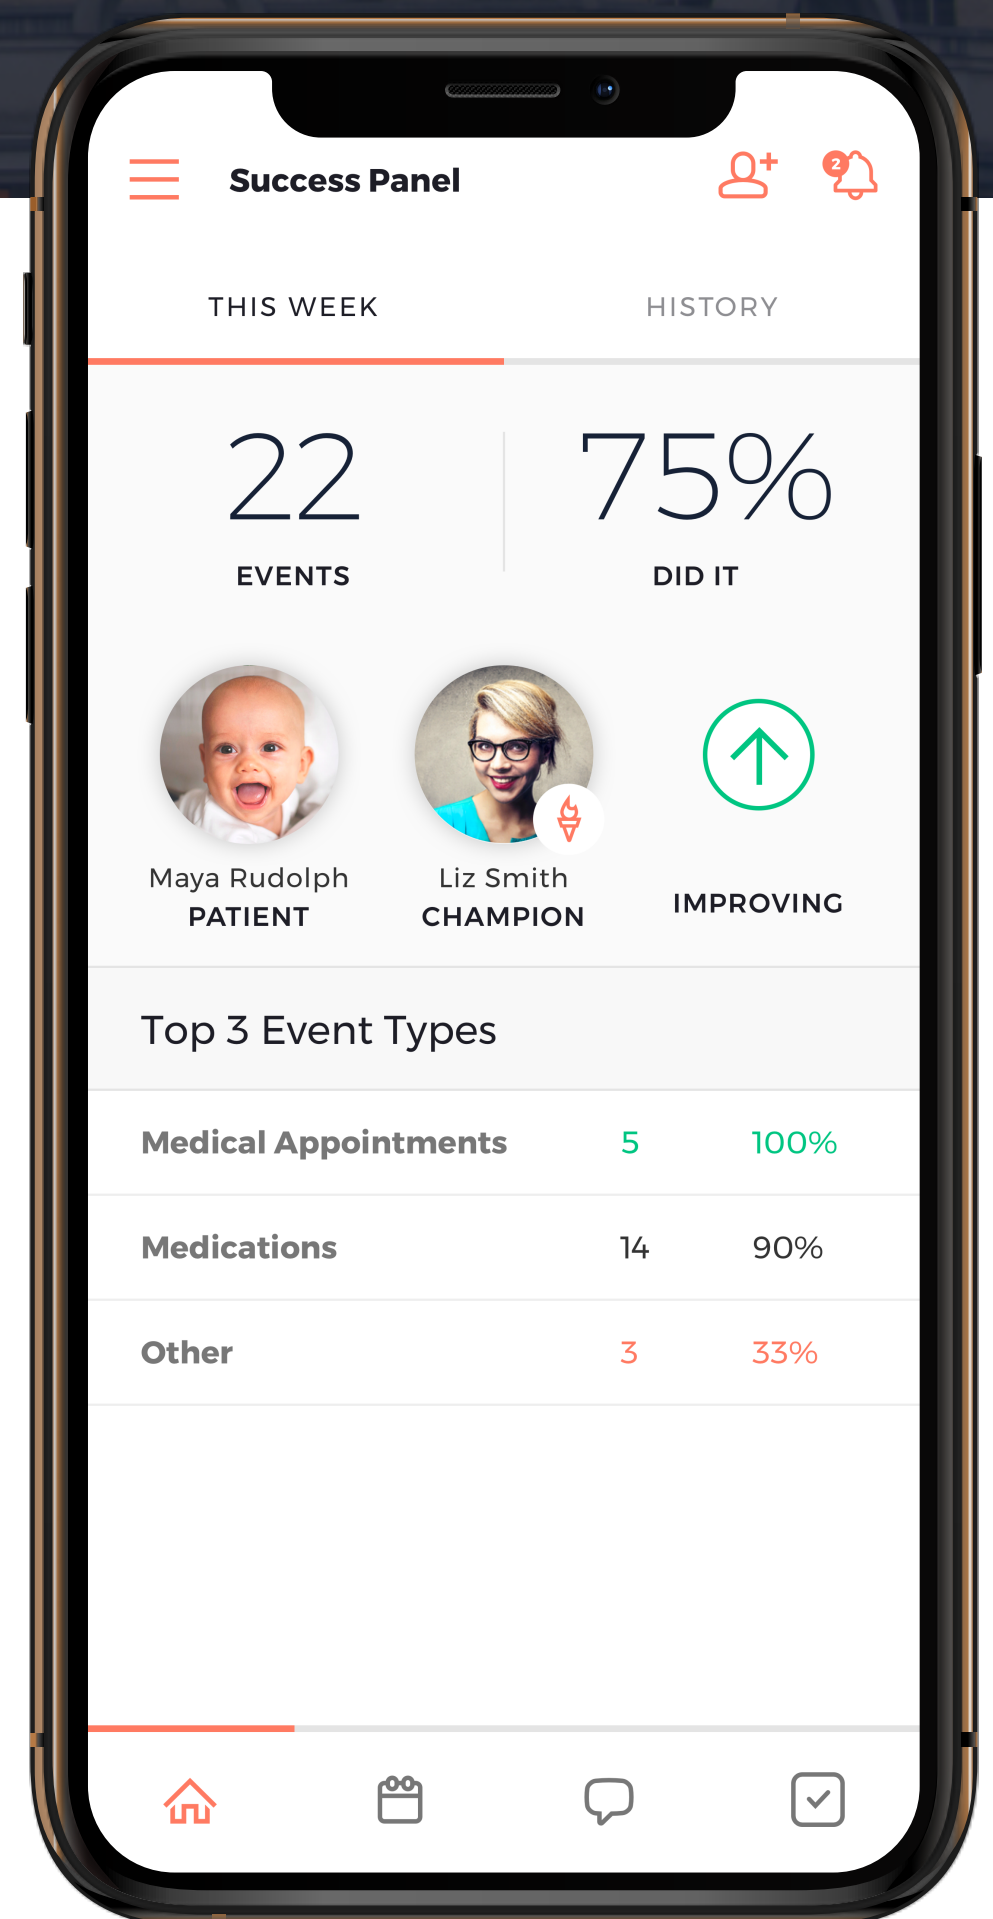

It's a simple, easy-to-use App (downloaded on your phone) so you can **track scheduled activities, medications and appointments**. Plus, you can receive and share updates, and ask any questions along the way. In addition to your SSM care team, you can invite any close family members that you want to follow along with you.

Outpatient is available on any smartphone or tablet (Android or Apple) and can be downloaded from the App Store or Play Store. It's also 100% private, secure and HIPAA* compliant.

* Provided to you for Free by SSM Health

* Outpatient is available on any Android or Apple smartphone or tablet, and can be downloaded from Apple App Store or Android Google Play Store.

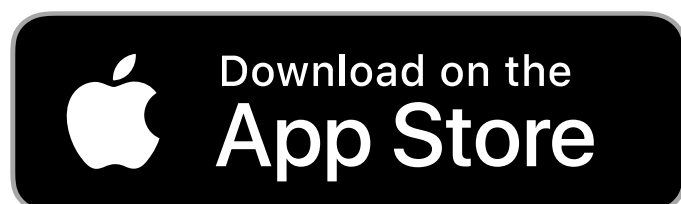

* HIPAA - Health Insurance Portability and Accountability Act
Protects your personal information from being shared inappropriately.

Here's How It Works

1 Provide phone number or email to (SSM Care Team)
They are going to invite you to a case within the Outpatient App

2 Download the Outpatient App
<https://getoutpatient.com/>

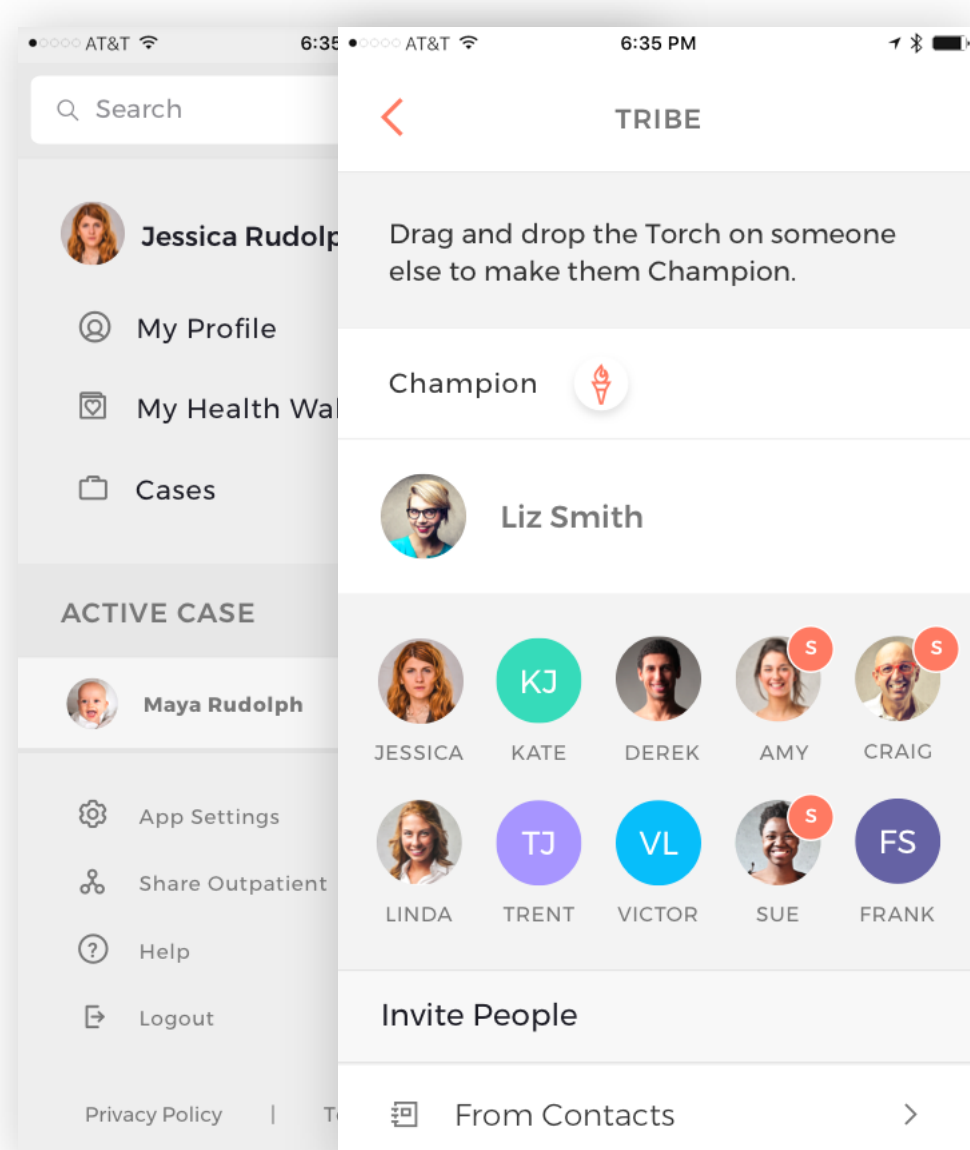

3 Receive Invite to Outpatient and join the case for your child
You will see your SSM Care Team already in the group
This group is your Tribe - and you can add any family or close friends to your Tribe
Now you're ready for - Schedules, Updates, Activities, and Communication
