OUTPATIENT APP

Healthcare Workflow Automation

Outpatient App is a **Digital Health Workflow Automation Platform** for military health systems (MHS), and beneficiaries. The Outpatient App Platform has proven it can save on the order of **10,000+ man hours** Per Year Per Installation (or MTF).

It's **Telehealth** for **logistics, coordination, and communication** to **schedule, track, and report** on medical steps and **Readiness** process. Improving efficiency for Medical Staff and Service Members saves time and leads to better patient care.

Feature Modules Include:

Scheduling

Virtual Consults

Occupational Health

On-Call Shifts

Readiness

Provider Messaging

Leading Military Telehealth

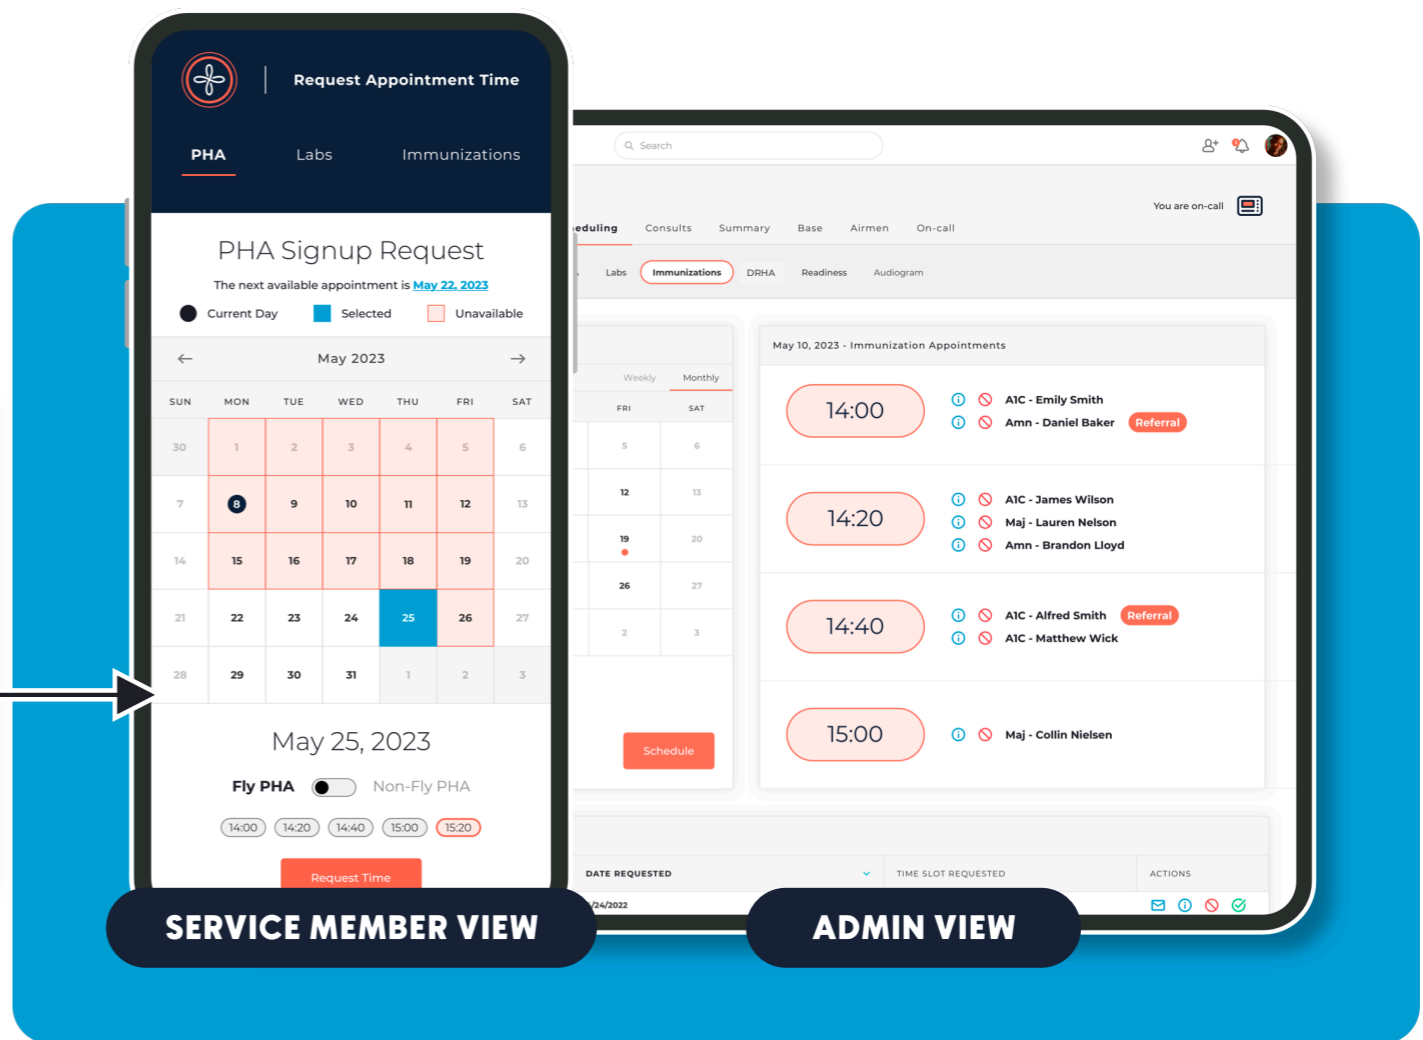

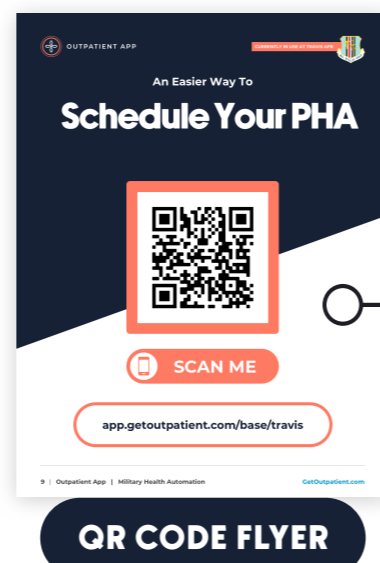

SCHD

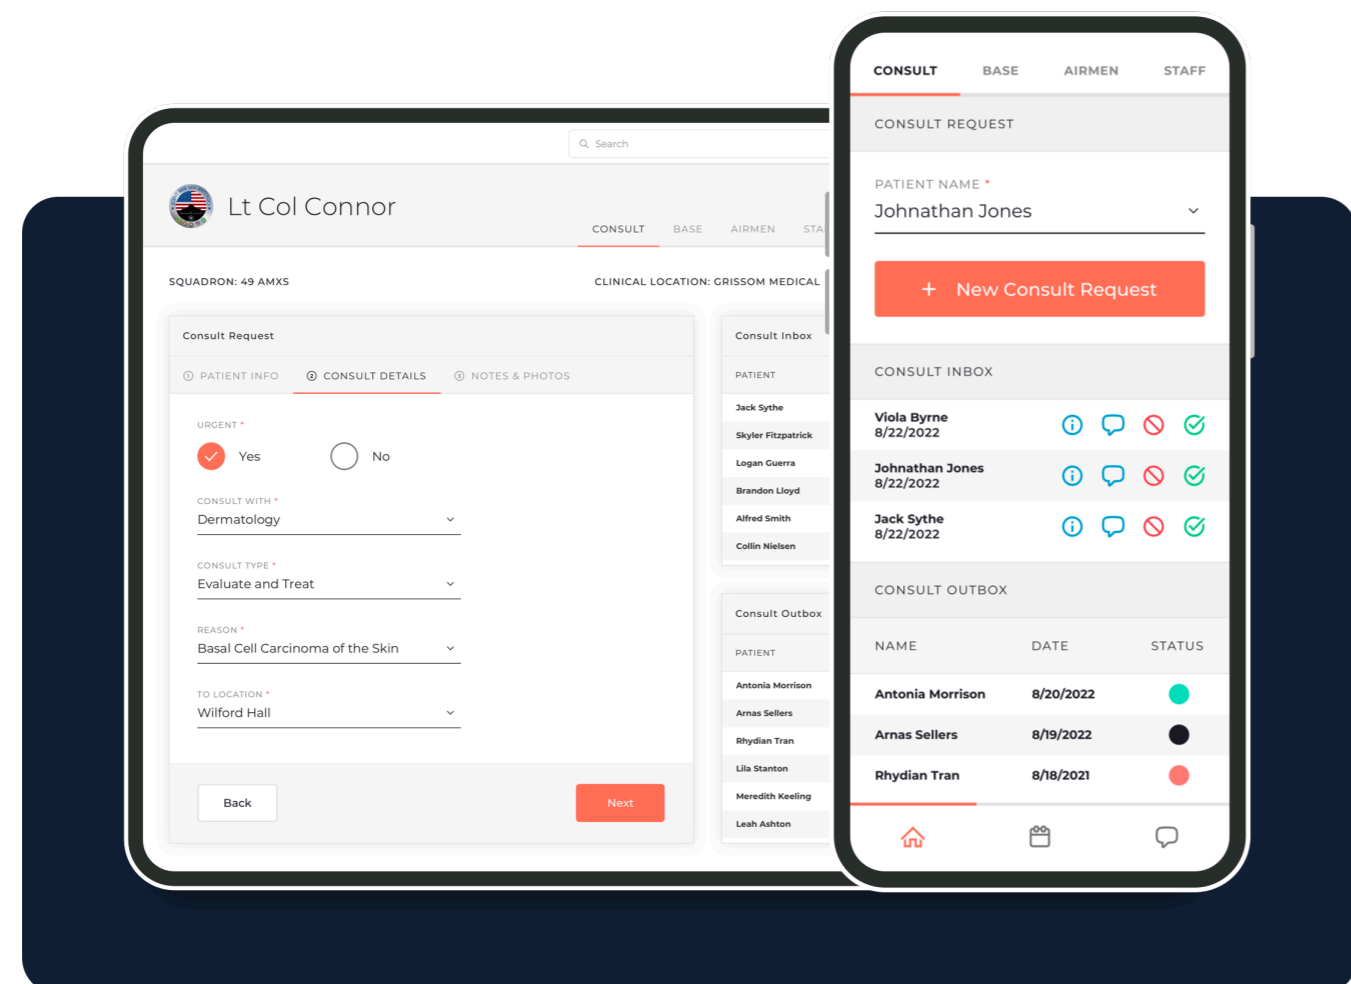

Scheduling

For MHS Med Readiness & Beneficiaries

Quicker, Easier way to Request and Schedule Appointments. Service Members can “self administer” a request virtually from their phone (QR code or link). Med Staff can “self administer” from their desktop dashboard asynchronously as their schedule allows. **PHA, Labs, Immunizations, Audiograms, DRHA, and other Readiness Appts.**

Can also be available for Civilian Employees and Beneficiaries as well.

VHM

Virtual Health Consults

Streamline Physician Consult Communications
Virtual Health Management (VHM) System

Consult Coordination: Provider to Provider (P2P) Virtual Messaging and Communication system for Consults and proper Referral coordination. Reduce Consult delays, Improve Physician communication, and improve Patient Care.

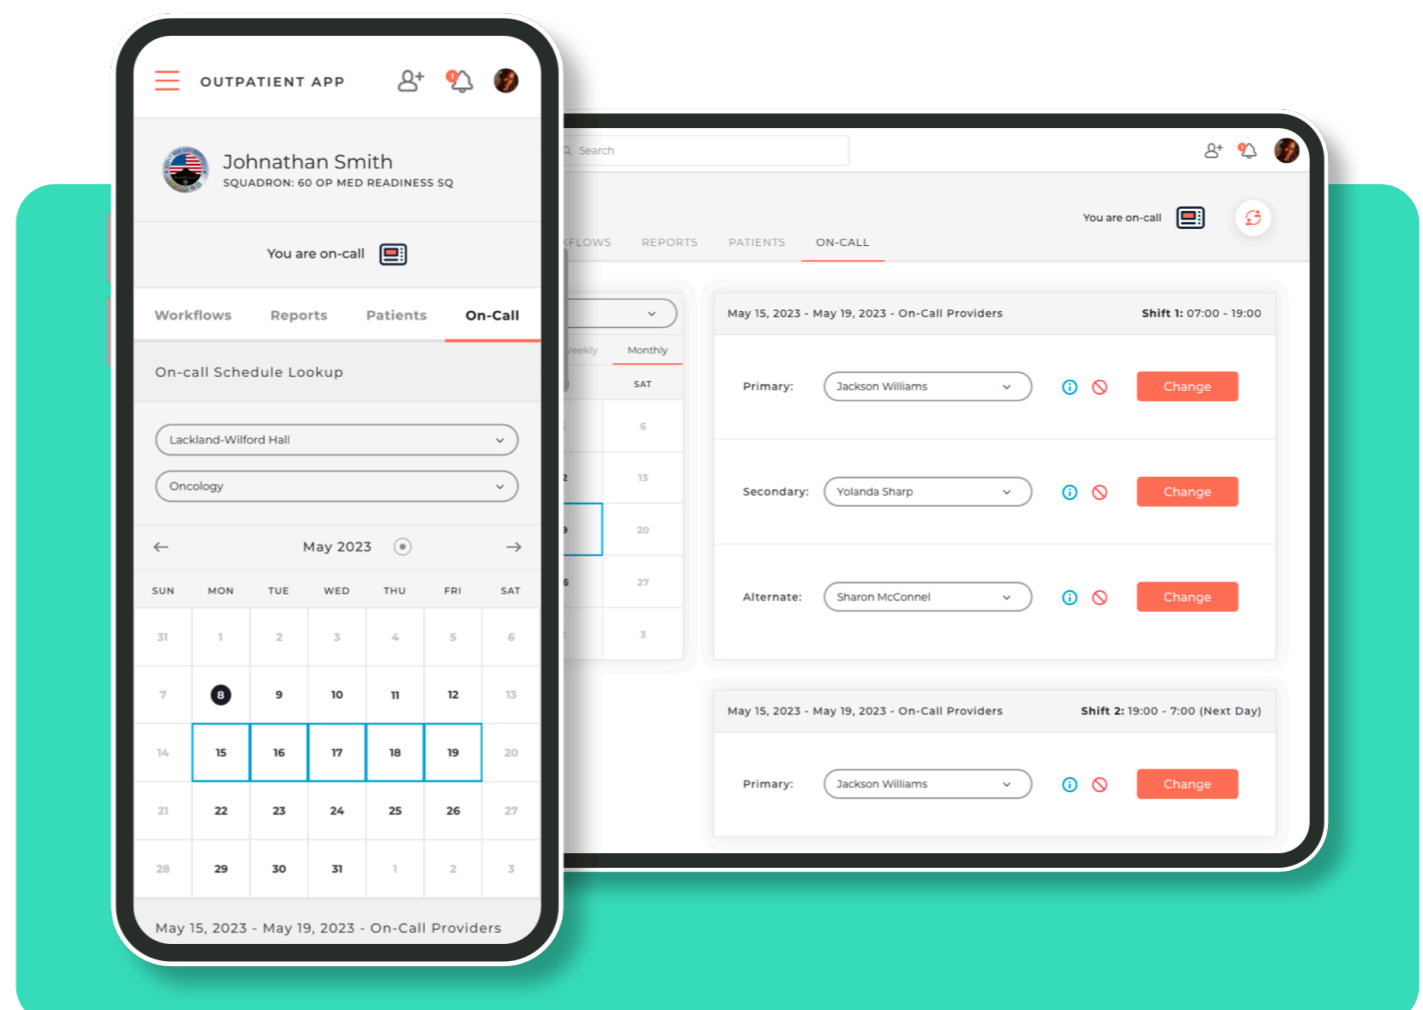

VHM

On-Call Shift Management

Med Staff Scheduling for any Dept
Eliminate Pagers, Increase Efficiency

Provider and Medical Staff On-Call Schedule and Coordination. Setup Staff Schedules and enable quick, easy customization as needed. **Save Providers hundreds of hours, and improve Patient Care.**

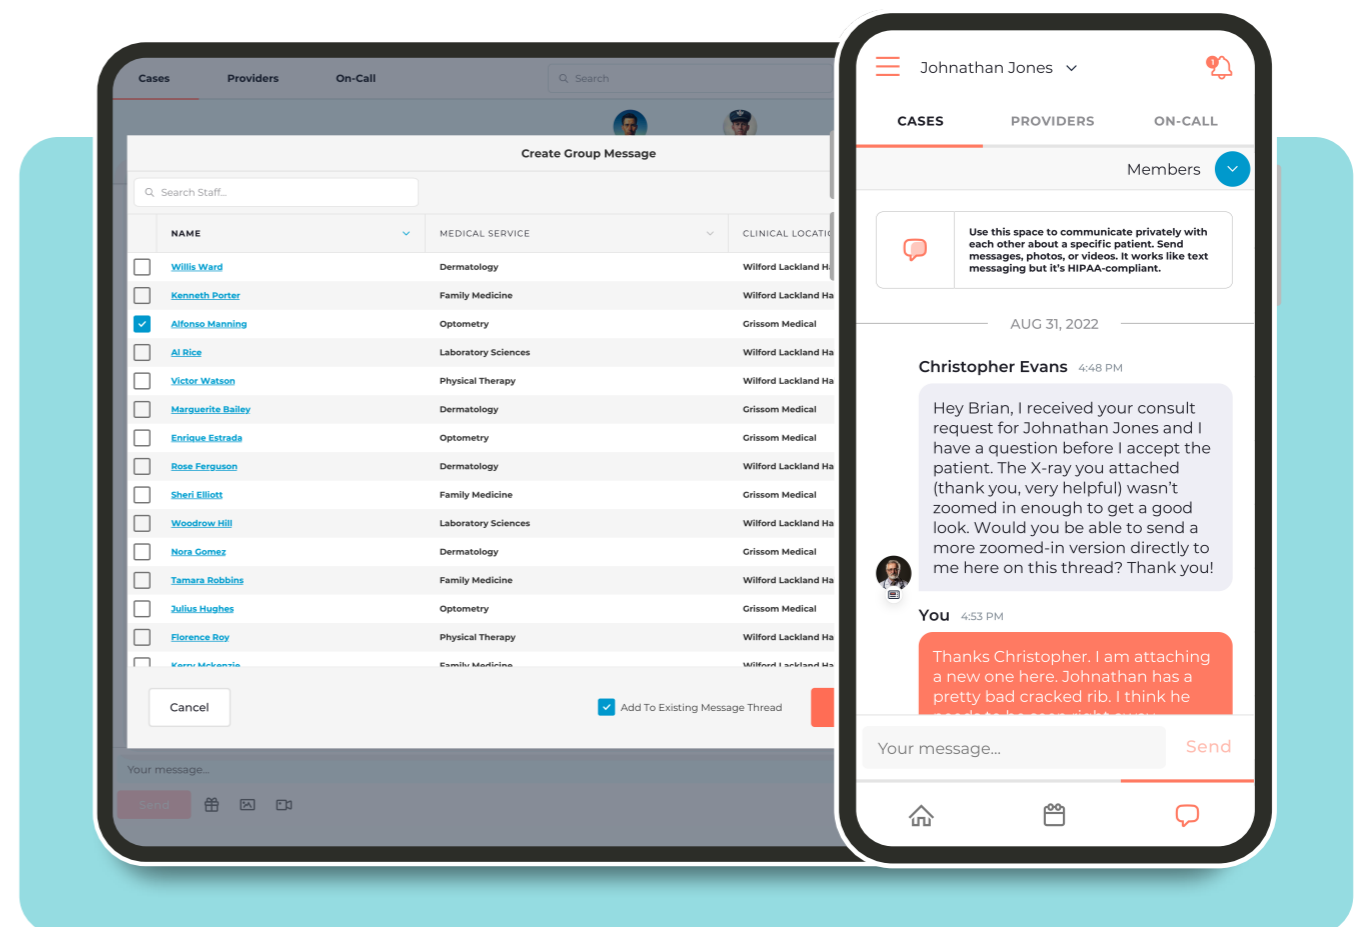

VHM

PRM - Provider to Provider Messaging

Simple, Secure, Organized Messaging

Provider to Provider messaging system that works from any connected device. **Quickly read and send secure messages** organized by patient, medical service, or clinical location to other Providers (1-on-1 or groups). Streamline Provider Communications organized by any medical or patient topic, where communications need to be tracked and stored. It's **HIPAA-compliant, secure, and Easy as your phone messaging app.**

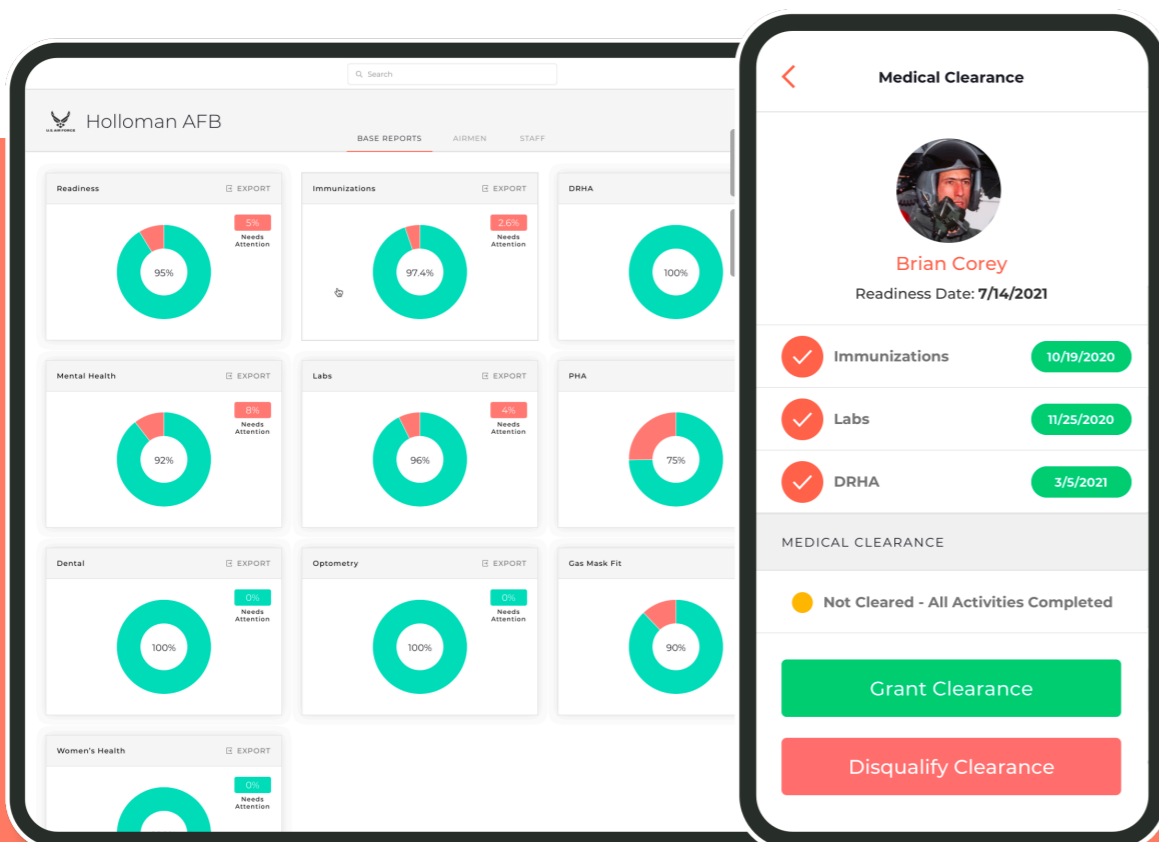

IMR

Individual Medical Readiness

Tracking & Coordination

The Outpatient App Medical Readiness System **schedules, tracks and coordinates each step in the medical clearance process for deployment**, commonly called Individual Medical Readiness (IMR). The process requires involvement and collaboration by teams of people from multiple departments. The Outpatient App simplifies the steps, enables quick and easy coordination, and overall makes the process way more efficient for everyone.

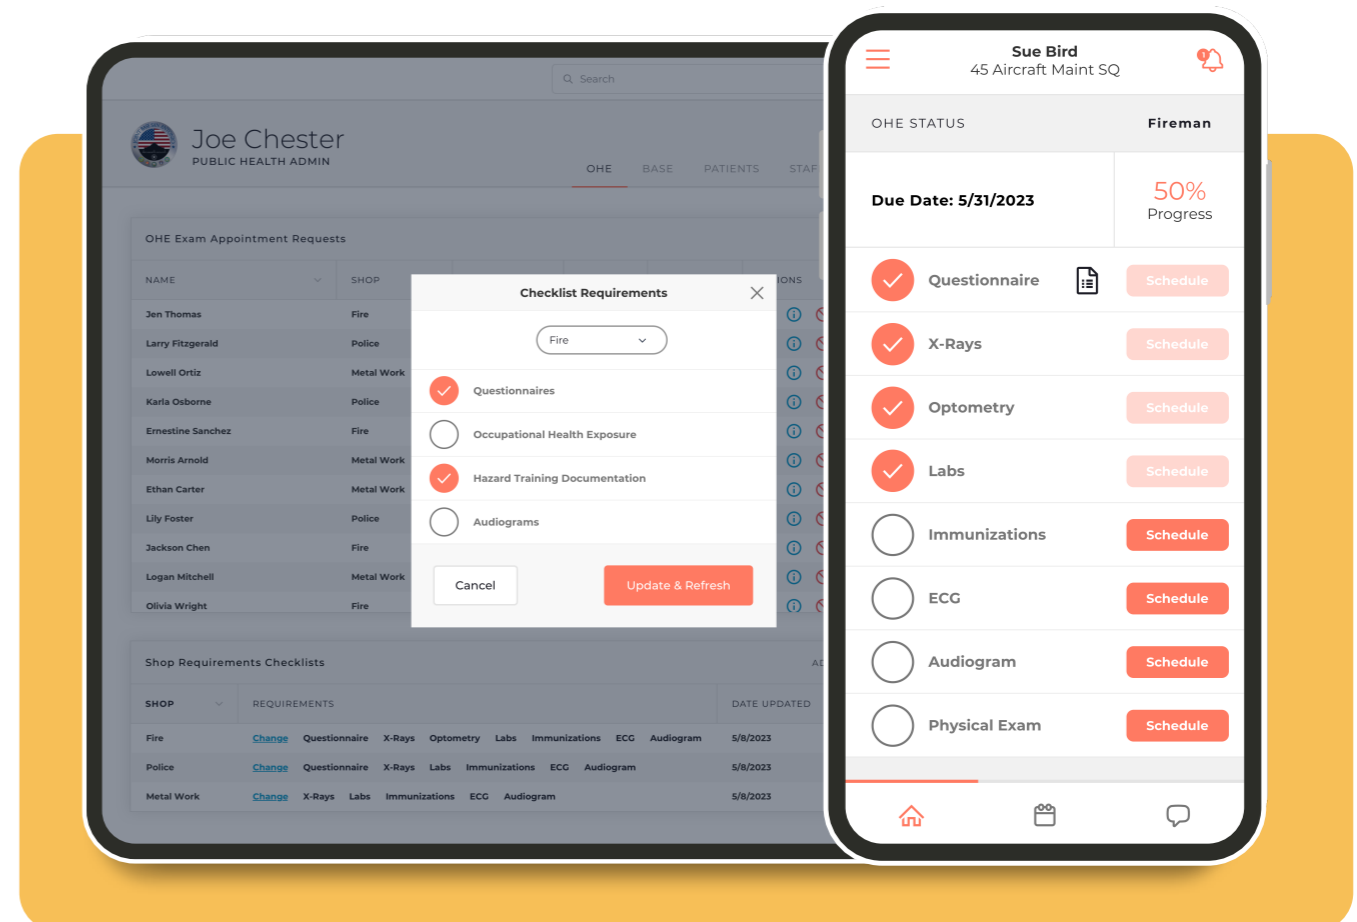

OHWO

Occupational Health Workflow Optimization System

Employee Medical Readiness Tracking & Reporting

Worker Readiness tracking and reporting system to monitor individual and department level Occupational Health compliance. Flexible to tailor specific steps for each location's requirements. Then track, schedule, notify and report on compliance. **Save Thousands of Staff hours and address long-term risk of non-compliance**
