SSG Alex Johnson
Tango Company

Hi, I'm due for a Dental exam before October 1. Can you tell me what's available?

Yes, I can help with that. Within the next 2 weeks, **Tuesday, September 29th at 1300** and **Wednesday, September 30th at 0900** are available at the clinic. Which of those would you prefer?

September 30th at 0900

Appointment requested.

CPT Ramirez ●
Acme Air Force Base

Do you have capacity for an urgent bone fracture patient? If so, I'll send over X-rays.

Yes, we do. Go ahead and send X-rays.

AI Assist

You're coming due for your Readiness Day. Would you like to request an appointment?

Outpatient App isn't just another scheduling tool. It's a digital nervous system for modern healthcare operations, especially tailored to the complex needs of **military readiness** and **health systems**. Rather than dipping into multiple disconnected tools, Outpatient centralizes workflows, automates key processes, and reduces the day-to-day grunt work that no one signed up to do.

The platform currently includes:

-  Readiness Scheduling System (SM Self-Scheduling)
-  PHA & MHA (Outpatient AI)
-  Individual Medical Readiness
-  Dental Readiness
-  Warrior Messaging
-  AI ASSIST

SBIR Phase III sole-source eligibility

These product modules benefit from Outpatient App's perpetual SBIR Phase III sole-source eligibility—allowing faster, competition-exempt acquisition across the entire platform. This contracting advantage applies to all modules and future enhancements.

OUTPATIENT APP

GOVERNMENT CAPABILITY PROFILE

MISSION DEPLOYMENT READINESS

Authorization first. Ready for the mission.

Outpatient pairs an Authority to Operate delivery model within the DAF enterprise cloud and proven, flexible federal procurement paths.

DAF ENTERPRISE CLOUD HOSTING AI Enclave within US.AF.MIL

DAF AI uses Enclave to secure and operate personnel and manpower systems. AI maintains Enclave for secure, DISA-approved, mission application hosting and infrastructure. Outpatient App is one of the first commercial products to be sponsored by the DAF CIO/CTO into this infrastructure. DAF AI also establishes multi-agency reciprocity across other federal agencies.

Authority to Operate (ATO)

Accreditation for Outpatient App within the DoW environment with reciprocity across other federal agencies

FedRAMP Class D (High)

Highest security posture for cloud service providers

Impact Level 5 (IL5)

Operating at IL5 security level

Continuous Controls

Automated security and compliance monitoring

FAST ACQUISITION PATHWAYS Contract Vehicles

Live SBIR Phase III IDIQ
Supporting Air Force Medical and DoW broadly

SBIR Phase III eligible
Sole source awards across federal agencies

Competitive requirements satisfied
Streamlined procurement under applicable FAR authority

Flexible ceiling and duration
No SBIR Phase III size or duration limitation

Multiple SBIR contracts
Phase I, Phase II, and Phase III experience

Security and compliance assurance

Continuously monitored readiness

 FedRAMP Class D (High) via DAF AI Landing Zone (includes ATO)	 NIST 800-53 v5 100% Certification Readiness real-time monitored	 NIST 800-171 100% Certification Readiness real-time monitored	 CMMC 2.0 100% Certification Readiness real-time monitored	 HIPAA + ADA Via Drata & AWS GovCloud ADA quarterly monitored

POWERED BY OUTPATIENT APP

CMR APPOINTMENT

Acme Medical Group's **Continuous Medical Readiness** process aims to streamline your readiness requirements completing all required Individual Medical Readiness appointments in **a single day**.

Please arrive at **07:30** at the **Flight Medicine Lobby** and plan on spending your duty day at the MDG on the day of your CMR appointment.

In order to help provide the best experience, please identify yourself:

- ☐ I am deploying/separating/pcs'ing in the next 6 months
- ☒ I am NOT deploying/separating/pcs'ing in the next 6 months

Your appointment will be rejected if you haven't done the following:

- ☒ I have completed my PHAq
- ☒ I have a 2992 Form on my IMR

Continue

Reimagine Readiness **Workflow Automation.**

OUTPATIENT APP

Outpatient AI

Outpatient AI Mobile PHA

Complete PHA Part A by typing naturally instead of navigating long, repetitive forms. Outpatient AI guides the conversation, captures required information, and prepares responses for secure review and submission.

Conversational Part A

Approachable Screening

Answer sensitive questions naturally in a guided, supportive conversation.

Smart Follow-Up Questions

AI asks relevant follow-ups based on each individual response.

Guided From Start to Finish

AI keeps every required PHA section clear and organized.

Clear Progress Tracking

See your current section and overall completion progress.

The screenshot displays the Outpatient AI mobile app interface for 'AI Guided PHA Part A'. The screen shows 'Section 7 of 9' with a 'Use standard form' button. A question asks: 'Chaplain, mental health care provider, or a community support counselor?'. A 'No' button is visible. Below, a message states: 'That section is complete. Review the answers below, then continue when they are correct.' A 'Section answers confirmed' button is present. The next question is: 'Overall, how would you rate your health during the PAST MONTH?'. Rating options are: 'Excellent', 'Very Good', '✓ Good' (selected), 'Fair', and 'Poor'. A 'Send selection' button is at the bottom.

Text. Tap. **Done.**

PHA & MHA Provider Review

PHA/MHA Admin gives providers a centralized view of submitted PHA Part A assessments that still require review or closeout. Providers can monitor completion status, identify due-soon or overdue assessments, compare PHA and MHA risk levels, review source responses and AI-assisted findings, manage referrals and readiness determinations, and complete the Provider Review workflow using either the graphical guide or AI Guided Chat.

Reimagine Readiness **Workflow Automation.**

Individual Medical Readiness

The Medical Readiness System schedules, tracks and coordinates each step in the medical clearance process for deployment. The Outpatient App simplifies the steps, enables quick and easy coordination, and overall makes the process way more efficient for everyone.

Dental Readiness

Supervisors and providers can instantly view a member's **dental readiness level**, upcoming **due dates**, and **classification**. Automated updates keep the dashboard accurate at all times, helping teams identify gaps early and reduce last-minute compliance delays.

Warrior Messaging

Sending a Warrior Message will share a secure website link to each Service Member with their IMR status and what they need to do.

AI ASSIST

with Outbound Telephony Agent

Our records show you're coming due for your Continuous Medical Readiness Day. It's easy to request an appointment with me. Would you like to?

Outpatient AI allows service members, providers, and administrators to interact with the system using natural language, just like a human assistant. Users can text or speak with the assistant to ask questions, check readiness status, schedule appointments, and conduct proactive outreach.
